

Tim Morera Garcia

Industrial Product Design student
Product design & AI automation

Looking for a graduation internship

I study **Industrial Product Design** at Hogeschool Rotterdam. For as long as I can remember I have been looking for smart solutions to the problems I run into in everyday life, and what I like most is the moment a design stops being a drawing and becomes something you can pick up and use. I work from **user research** to **CAD** and **prototype**, and I use **AI tools and automation** to work faster. I work well in a team: I listen, but I am happy to take the lead when a project needs direction.

Experience

Content Automation | Buigbaar.nl

2026 to present

Buigbaar.nl makes magnetic kitchen walls and lighting. I am setting up an **automated content pipeline** with a **dashboard** to run it from.

R&D Intern | Streetlife

2025 to 2026

Research and development on street furniture for public space: **concept work**, **CAD**, and **testing prototypes**.

Selected projects

Mobile Medical Unit | team of six, for a GP

A cargo bike that folds open into a small GP practice, bringing primary care to homeless people in the place where they already are. Alongside it I built **ZorgDichtbij**, a web app to request help or supplies from the unit.

Bus Shelter

A glass and aluminium bus shelter, calculated to carry half a metre of snow and planned so two people can place it in an afternoon.

Cordless Power Tool

A cordless drill for people who work with one hand, checked in the hand with a foam model.

Education

Industrial Product Design | Hogeschool Rotterdam

2022 to present

Bachelor (HBO). Product development, CAD, 3D printing and prototyping. Propedeuse obtained in the first year.

Built Environment | Hogeschool Rotterdam

2020 to 2021

Technical drawing, structures and spatial design, before moving into product design.

Graduation internship

Skills

Fields

CAD & 3D modelling |
Prototyping | User research |
Design for manufacture | AI
tools & workflows | AI
automation

Design skills

Product design | Concept
sketching | 3D CAD modelling |
Prototyping | Technical drawing
| Ergonomics | Materials &
finishing

Tools

SolidWorks | Canva | Miro |
CapCut | VS Code | ChatGPT |
Claude Code | Higgsfield

Soft skills

Problem framing | Taking the
lead | Collaboration |
Presenting & documenting |
Working to a deadline | Hands-
on making

Languages

Dutch

English
